

PhotoShop CS6 Essentials & Beyond

Course Content

General Outline

Adobe PhotoShop is the industry standard in photo-scanning, editing and manipulation.

Our course will take you through the important aspects of digital imaging and how to create the best image.

You will also learn how to improve and enhance your images for brightness, contrast, gamma control, grey levels, colour balance and tonal range and gradation. You will also learn the important meanings of these terms.

The course will take you through image manipulation and editing techniques.

Montaging of images, cleaning up, and colouring of images are covered in the hands-on exercises.

You will also be introduced to important aspects of outputting your images, colour separations, and important considerations depending on how you will use your images, either for 'high-end' commercial printing or for online distribution.

Client Reviews

"I was impressed with the presentation of the course."

Ines, Nurse/Admin

"Most impressed with the knowledge of the instructor and the clearly explained examples."

Scott, Defence

"What struck me was the genuine attention and care of the instructor to the various levels of trainees. Now I'm much less apprehensive to technological change!"

Paul, Hydro-worker

"The delivery was excellent. Our trainer made me feel extremely comfortable with asking questions."

Cassie, Sales Admin

"I was most impressed with the facilitation - the trainer's knowledge of the content was thorough and it was taught in a light-hearted way."

Debra, Admin

"A very practical and hands-on course."

Karen, Teacher

"This great course was self-paced, my questions were answered accurately and the assistance was excellent."

Jenny, Admin Assistant
