

Excel Advanced

Course Content

General Outline

Some of the more complex aspects of Excel are covered in this Advanced course—but we make it all easy and straight forward for you.

The course focuses on how to create more powerful reports from your data, how to speed that process up and automate it, and how to make it all user-friendly.

You'll learn how powerful macros can be. **And we'll show** you how to adapt it all to your work to save time and solve your problems.

Detailed Course Outcomes

- ◆ Use features to update and massage data automatically.
- ◆ Use text formulas/functions (LEFT, UPPER, etc).
- ◆ Use IF functions (IF, COUNTIF, SUMIF, multiple IFs).
- ◆ Use Lookup functions (V/H LOOKUP).
- ◆ Use complex 'nested' formulas to extract data better.
- ◆ Use automated database features and SUBTOTAL functions.
- ◆ Create, edit and troubleshoot macros and VBA.
- ◆ Use data validation to prevent data-entry errors.
- ◆ Use conditional formatting for 'dashboard' reporting.
- ◆ Apply data-entry protection to data correctly.
- ◆ Share workbooks and work with templates.
- ◆ Integrate data more efficiently and create live links.

Client Reviews

"I'll be going home right now and trying out some of this great stuff!"

Carol, Payroll Officer

"I came here to master macros and that's exactly what I did. Will save me stacks of time."

Meredith, Finance

"Being able to come for a free refresher course will make it sink in better."

Richard, Engineer

"Excellent facilities, small class, and they're nice people too!"

Lorrae, HR Coordinator

"Wow, they just didn't teach you the shortcuts, but gave me some better ideas for my reports as well."

Peter, Construction planner

"Will be back for more. Really enjoyed it."

Jacqui, Project officer
